## Application No.

## Office Action Summary

09/678,016

Applicant(s)

Examiner

Art Unit

Wilson et al.

1631 **Ardin Marschel** - The MAILING DATE of this communication appears on the cover sheet with the correspondence address -Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_\_ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). 1) Responsive to communication(s) filed on \_\_\_\_\_\_ 2b) X This action is non-final. 2a) This action is FINAL. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quay@35 C.D. 11; 453 O.G. 213. Disposition of Claims is/are pending in the applica 4) X Claim(s) 1-26 4a) Of the above, claim(s) \_\_\_\_\_\_ is/are withdrawn from considera is/are allowed. \_ is/are rejected. 6) Claim(s) \_ is/are objected to. 7) Claim(s) \_\_\_\_\_ 8) X Claims 1-26 are subject to restriction and/or election requirem **Application Papers** 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on \_\_\_\_\_\_ is/are objected to by the Examiner. \_ is: a□ approved b)□disapproved. 11) The proposed drawing correction filed on \_\_\_\_ 12) The oath or declaration is objected to by the Examiner. Priority under 35 U.S.C. § 119 13) Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d). a) All b) Some\* c) None of: 1. 

Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. 3. 
☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). \*See the attached detailed Office action for a list of the certified copies not received. 14) Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e). Attachment(s) 18) Interview Summary (PTO-413) Paper No(s). 15) Notice of References Cited (PTO-892) 19) Notice of Informal Patent Application (PTO-152) 16) X Notice of Draftsperson's Patent Drawing Review (PTO-948) 17) Information Disclosure Statement(s) (PTO-1449) Paper No(s). 20) Other:

Applicant(s) are hereby informed that future correspondence should be directed to Art Unit 1631.

Applicant is hereby notified that the required timing for the correction of drawings has changed. See the last 6 lines on the sheet which is attached entitled "Attachment for PTO-948 (Rev. 03/01 or earlier)". Due to the above notification Applicant is required to submit drawing corrections within the time period set for responding to this Office action. Failure to respond to this requirement may result in abandonment of the instant application or a notice of a failure to fully respond to this Office action.

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-11, drawn to an IMPDH molecule or molecular complex, classified in Class 530, subclass 350.
- II. Claims 12-21, drawn to a machine-readable data storage medium for displaying a 3-dimensional model of IMPDH, classified in Class 703, subclass 11.
- III. Claim 22, drawn to a machine-readable data storage medium directed to a Fourier transformation of at least a portion of IMPDH as compared to an unknown molecule or complex, classified in Class 703, subclass 11.
  - IV. Claim 23, drawn to a method for evaluating the ability

- V. Claims 24 and 25, drawn to a method of utilizing molecular replacement via IMPDH structure to generate at least a portion of a unknown structure, classified in Class 702, subclass 19.
- VI. Claim 26, drawn to a method of preparing a IMPDH/XMP\*/MPA crystal, classified in Class 530, subclass 333.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Groups II-V are related as product and process of use or products of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the molecule or complex of Group I may be utilized in the distinct usages or products of use of Groups II-V which are distinct as follows.

Each of the inventions of Groups II-V is directed to differing modeling practice specialties. Group II is directed to displaying 3-dimensional IMPDH as structures potentially to study. Group III is directed to a medium wherein Fourier

Serial No. 09/678,016

transformation is utilized to represent the IMPDH structure for modeling manipulation with this special characterization. Group IV is directed to ligand binding modeling to whatever 3-dimensional structure is desired. Group V is directed to the practice of replacement to define an unknown structure. Thus, these are distinct usage or products for the usage of Group I thus supporting the undue search burden if any subset of Groups I-V were searched together.

The inventions of Groups I(thus also with Groups II-V) and Group VI are related as product made and process of making, respectively. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the process of Group VI is directed to a particular molecular complex. The specifics of this complex are not required in the product of Group I which thus is distinct as directed to generic molecular complexes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993) (See 37 CFR § 1.6(d)). The CM1 Fax Center number is either (703)308-4242 or (703)305-3014.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ardin Marschel, Ph.D., whose telephone number is (703)308-3894. The examiner can normally be reached on Monday-Friday from 8 A.M. to 4 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, Ph.D., can be reached on (703)308-4028.
